

Eco-Auditor Emissions Report

Company: Pacific Freight Co.

Reporting period: FY 2026

Generated: 2026-09-30

SUMMARY (metric tonnes of CO2 equivalent, tCO2e)

Total: 1173.091 tCO2e

Scope 1: 812.019 tCO2e

Scope 2: 107.838 tCO2e

Scope 3: 253.234 tCO2e

Scopes covered: Scope 1, Scope 2, Scope 3

Confidence: 86%

ORGANISATIONAL BOUNDARY

Consolidation approach: not specified

GREENHOUSE GASES

Reported as a CO2e aggregate; per-gas breakdown not available.

Biogenic CO2: not reported separately.

BASE YEAR

Base year: not set

METHODOLOGY

Methodology: Each entry is activity data multiplied by an emission factor; entries are grouped into Scopes 1-3 as defined by the GHG Protocol Corporate Standard and summed in metric tonnes CO2e.

1 of 11 factors applied are provisional (industry-typical values pending citation verification)

EXCLUSIONS AND LIMITATIONS

- Scope 3: only the categories recorded in Eco-Auditor are included. Other Scope 3 categories are not reported.
- Scope 2: purchased electricity uses eGRID grid-average (location-based) factors. A market-based Scope 2 total is not reported.
- Per-entry confidence scores are preset values (by category, or as stored with the entry); they are not an assessment of the underlying documents.
- This report has not been reviewed or assured by an independent third party, and it is not a regulatory filing.
